

## My Life and study journey to earn peace

Knowledge is for sharing. Do not keep your knowledge to yourself alone. Let it grows. The more you share, the more you learn and in the end you become a better person. InsyaAllah. How can I find happiness and peace in life? A pot of gold is said to be at the end of rainbow and so is imaginary happiness and peace in life. All this is by sharing or in concert with like minded people and if they are none find some and convert them into your line and share peace and happiness among them.

### **1001 Inventions: Pioneers of Science and Technology**

1001 Inventions: Pioneers of Science and Technology

Discoveries made from the 7th to 17th centuries by multi-faith scientists in Muslim civilization have had a huge but hidden influence on the modern world. Knowledge from Assyrian, Babylonian, Chinese, Egyptian, Greek, Indian, Persian and Roman civilizations was highly prized in the Muslim world. Men and women scholars advanced science by building upon the ancients and making breakthroughs that paved the way for the European Renaissance.

This Golden Age of Discovery in the Muslim World (southern Europe, Africa, Middle East, Asia and to China) took place during the so-called Dark Ages of Europe. Muslim civilization promoted free-thinking, rationalism and tolerance. Many scholars expressed their faith by seeking to serve society and improve quality of life for others.
