

## 1001 Inventions

[Arts & leisure](#) [learning](#)

*1001 Inventions* traces the forgotten story of a thousand years of science from the Muslim world, from the 7th century onwards.

Featuring many interactive exhibits, displays and dramatisations, the exhibition explores the shared scientific heritage of diverse cultures and looks at how many modern inventions can trace their roots back to Muslim civilisation. Exhibits include numerous electronic interactives, a reproduction of a 9th century flying device and a five-metre high replica of the "Elephant Clock". The exhibition features more than sixty exhibits and a large screen displaying a mini-movie starring Oscar-winning actor Ben Kingsley as Al-Jazari, inventor of the fabled Elephant Clock.

Free. Open 10am - 6pm

Next event - Tuesday, 18 May, 2010 - 10:00
