Introducing **1001 Inventions**, a book to help us Discover the our World... It will help us to experience a thousand years of n about a lost age of Muslim innovation and invention to discove of many Western discoveries.

There's a big gap in the teaching of the History & Science of Ci education systems, the Greek & Roman civilizations are covere to the 5th century, then we are told that there were the "Dark suddenly there is a revival in the 16th century with the Renais is, what happened in between? Did modern civilisation really ri

It is, actually, a historical fact that scientific discovery was hap world during these 1000 years. We believe that for students to complete sense of the histories of civilizations, that this should

Brought to you by the makers of Muslim Heritage, 1001 Inven groundbreaking global educational initiative exploring the Musl building the foundations of Modern Civilisation.

It is a unique UK based educational project that reveals the ric Muslim community share with other communities in the UK, Eu World. It is a non-religious and non-political project seeking to aspects of progress in science and technology to act as a bridg the interdependence of communities throughout human history.

1001 Inventions is a groundbreaking global educational initiati Muslim contributions to building the foundations of Modern Civ of a UK and world wide travelling exhibition, a colourful easy to

dedicated website and a themed collection of educational posts, secondary school teachers' pack and a curriculum enrichment

From the 8th Century, Muslim tradition and culture set trends and style that still influence us today. Their experiments, discoveries with liquids, light and time opened the door to myriad new chemical measurements of time in precise and minute detail and devices for observation and deep sea exploration.

### The Book

Over 350 pages of colour photographs and written in an accessible style for those with limited knowledge of either Islam or history.

Adam Hart-Davis; Photographer, Writer and TV Science Presenter of BBC Series 'What the Ancients Did for Us'. Said this about the book: *"This glorious book overflows with the great ideas of the Muslim middle ages. From al-Jazari and his elephant clocks and al-Kindi and Ibn al-Haitham with their revolutionary optical theories."*

10 Educational Posters in all!

There is also a free downloadable Teacher's Pack which can be with our Curriculum Enrichment Programme, which has been c teachers and the classroom environment. Includes science act olds for the Science National Curriculum. It maps relevant hist scientific and technological discoveries and principles to the na secondary schools.

The books and posters are a great resource to bring together I Muslims seeking to advance Civilisation through the study of M

They aim to raise global awareness on the importance and relevance of African Heritage and its mostly unaccounted contribution to current world development.

### Examples

Al-Jazari's water powered scribe clock brought back to life after a long period of obscurity. This fascinating water powered portable clock stands 1 metre high and 1 metre wide. The scribe with his pen is synonymous to the hour hand. This is yet another example of an ingenious water system by a genius of the Islamic Golden Age.

The water raising machines that were developed by the Muslim engineers of the Islamic Golden Age. They devised new techniques to catch the water and made use of a variety of available devices, drawing on their own knowledge and that of the civilizations they lived in.

Piri Re'is, a Turkish captain, created a map in 1513 which has been called the famous 'Map of America'. This astonishing map clearly shows the Americas, as well as the Andes Mountains of South America. Both of these were discovered long after this map was created in 1513.
